81m

The Turquoise Vitruvius exemplifies both power and strength while maintaining flawless, fluid and dynamic lines.

Her signature Vitruvius plumb line bow gives her the longest length waterline possible, and her main lines are parallel to the waterline and completely uninterrupted.

The superstructure is balanced, compact and accentuates her dynamic design when contrasted with her very long and expansive aft terraces. The colour palette of the Turquoise 81m is metallic blue to reflect the sky and ocean enable her to perfectly blend in to her surroundings.

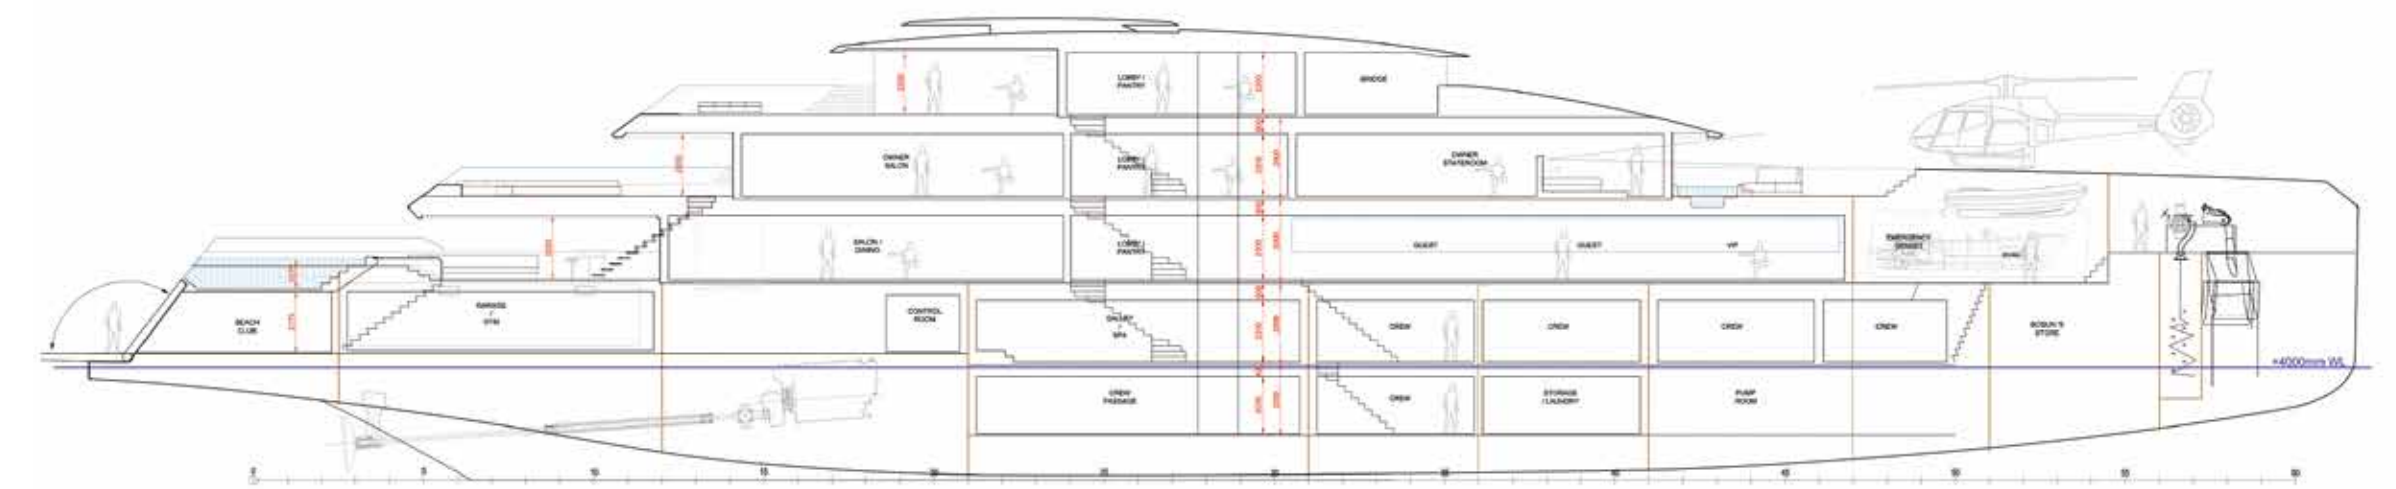

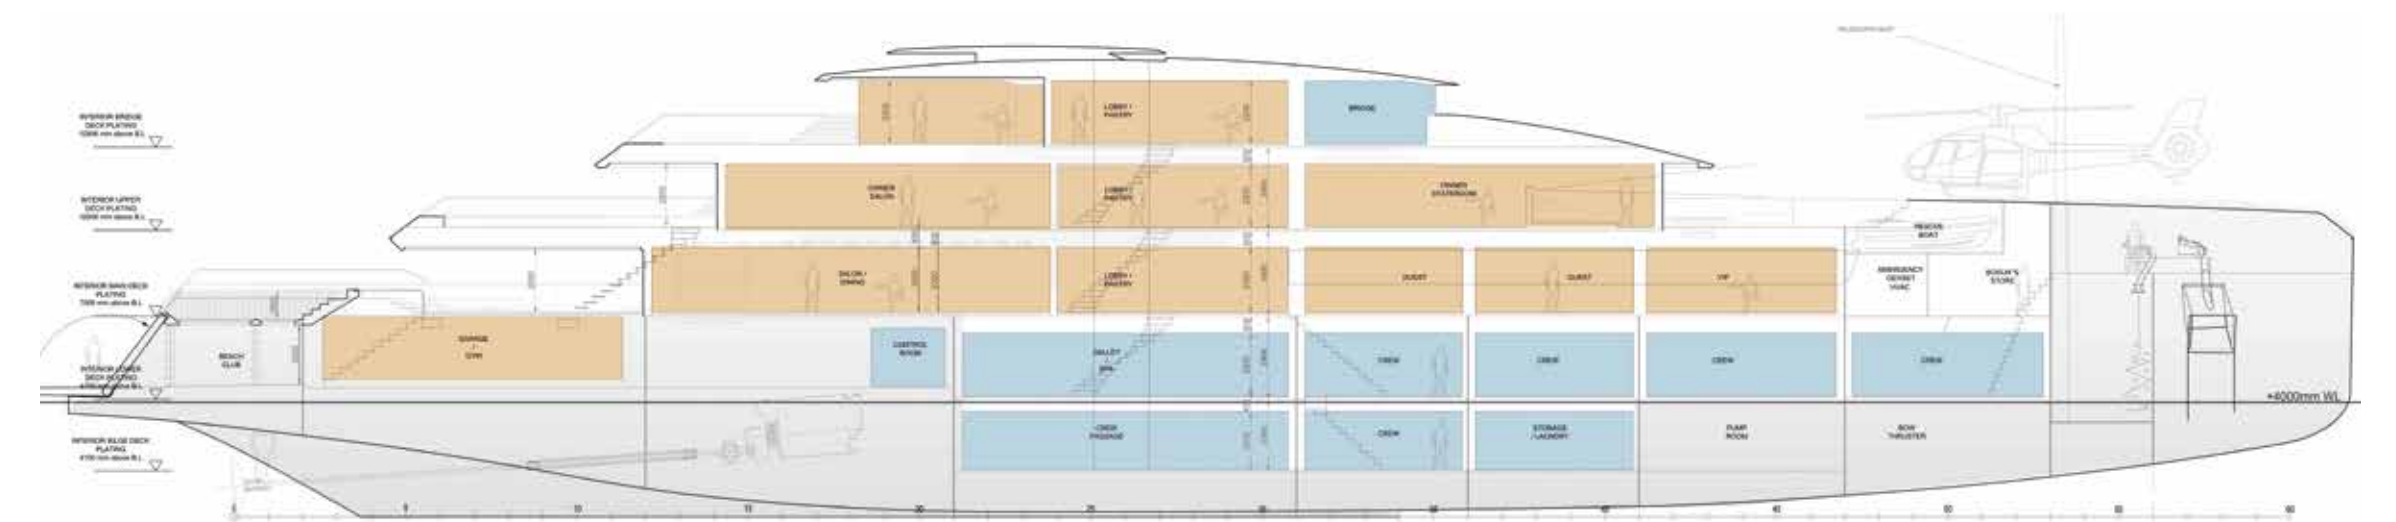

Designed to exceed the owner's wishes, the layout is centered on the owner's apartments. A vast stateroom on the upper deck with a sea view is coupled with a private lounge, and an office and featuring a wrap around private terrace with jacuzzi and direct access to the helipad.

The main deck hosts 6 guest cabins, including two convertible VIP cabins.

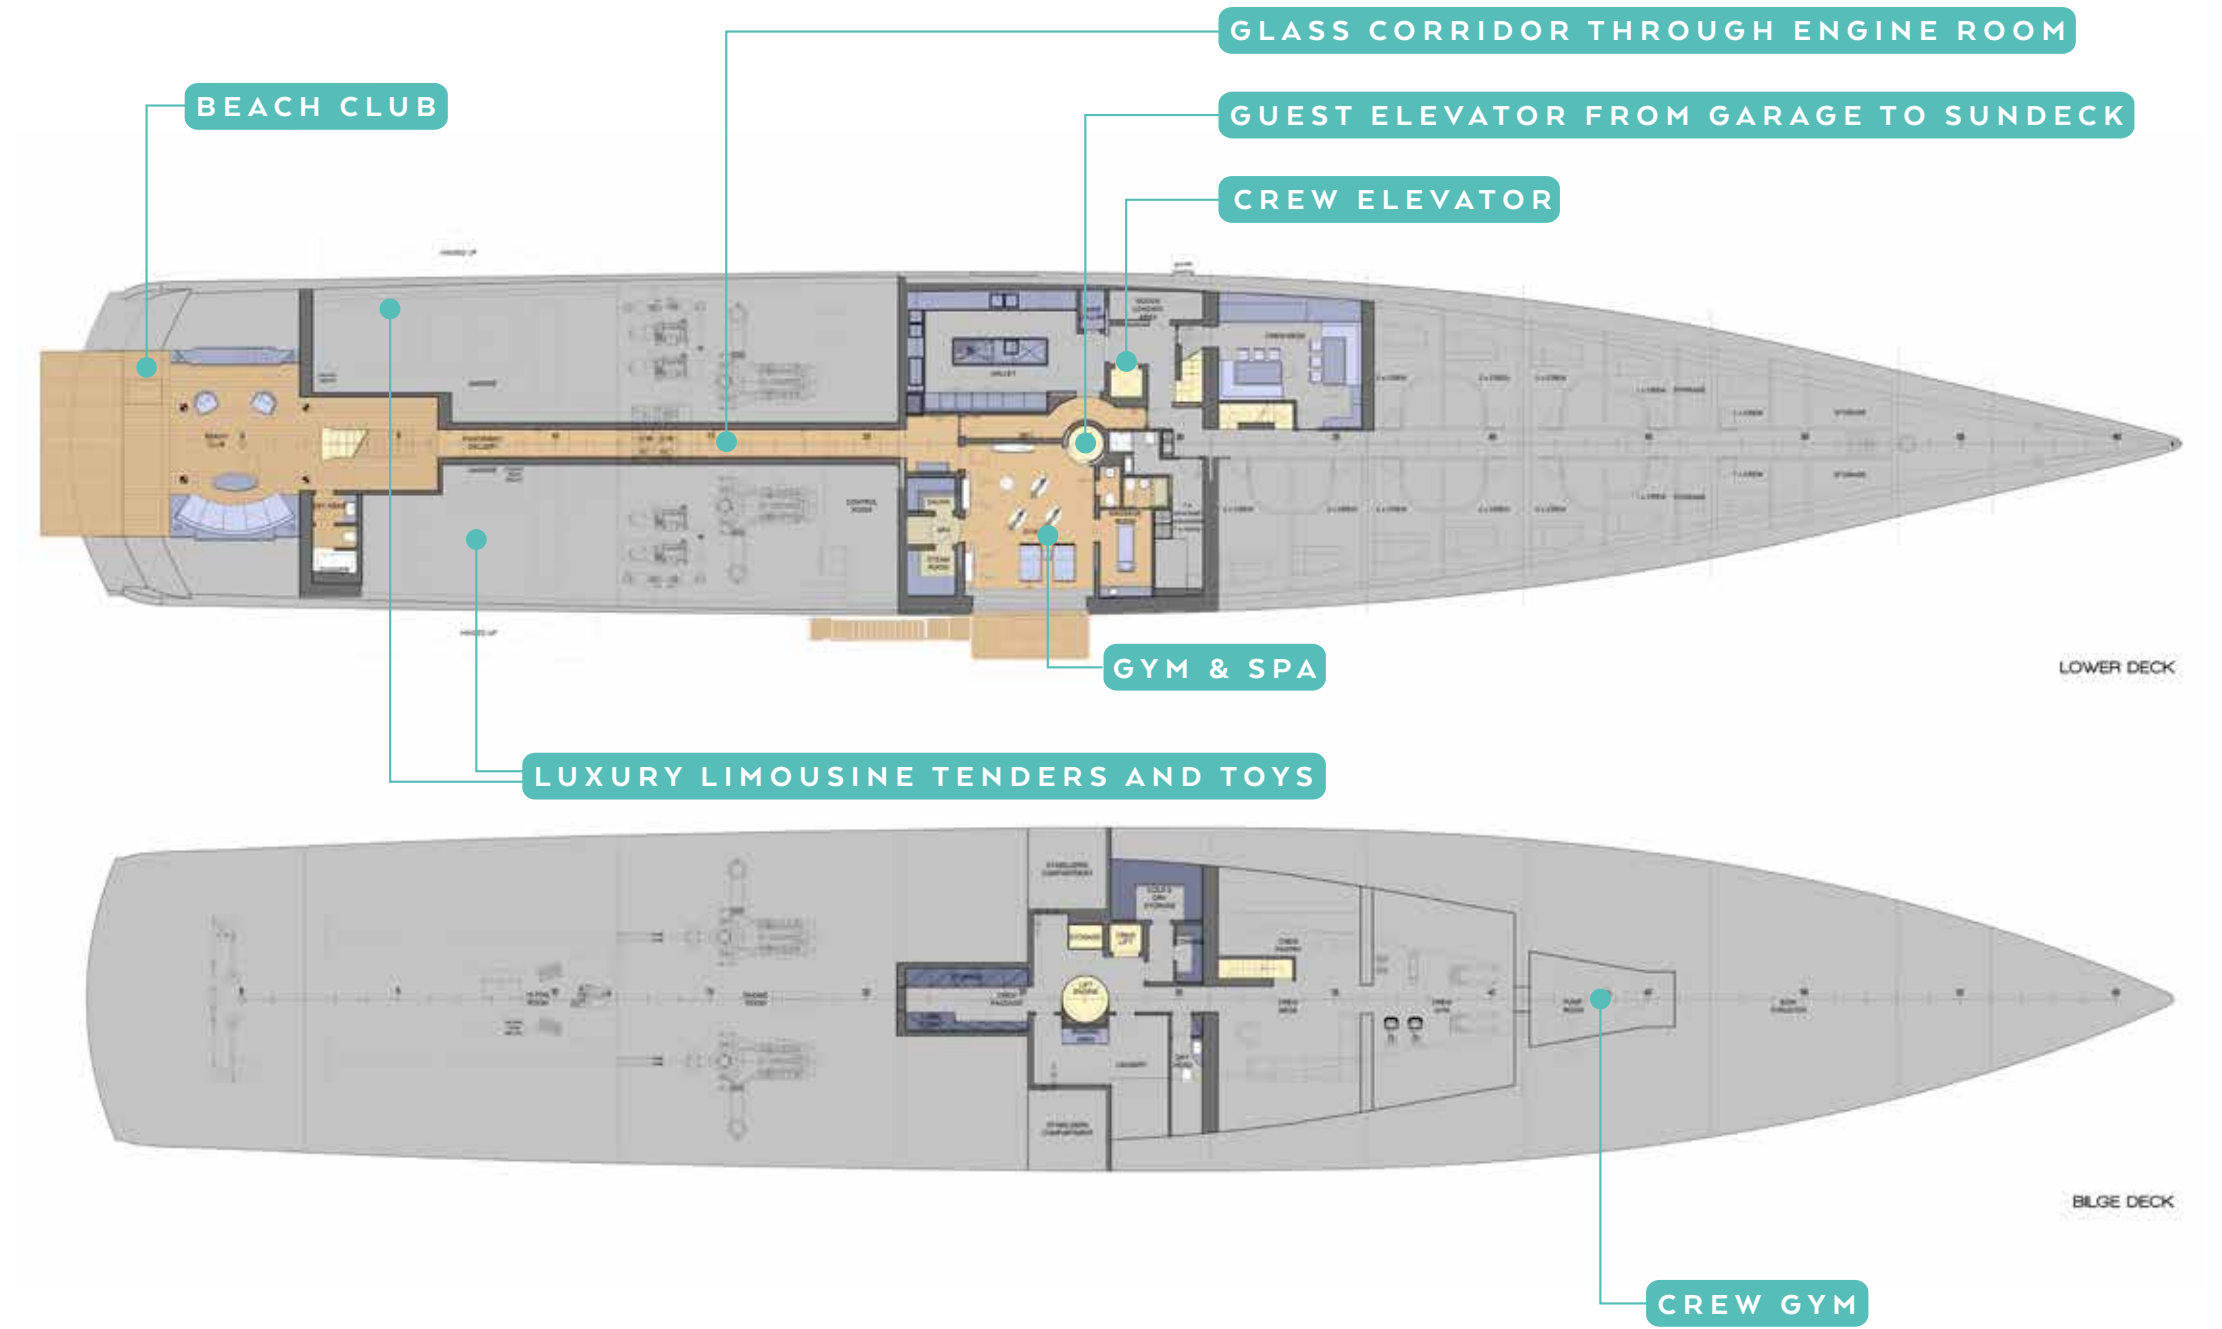

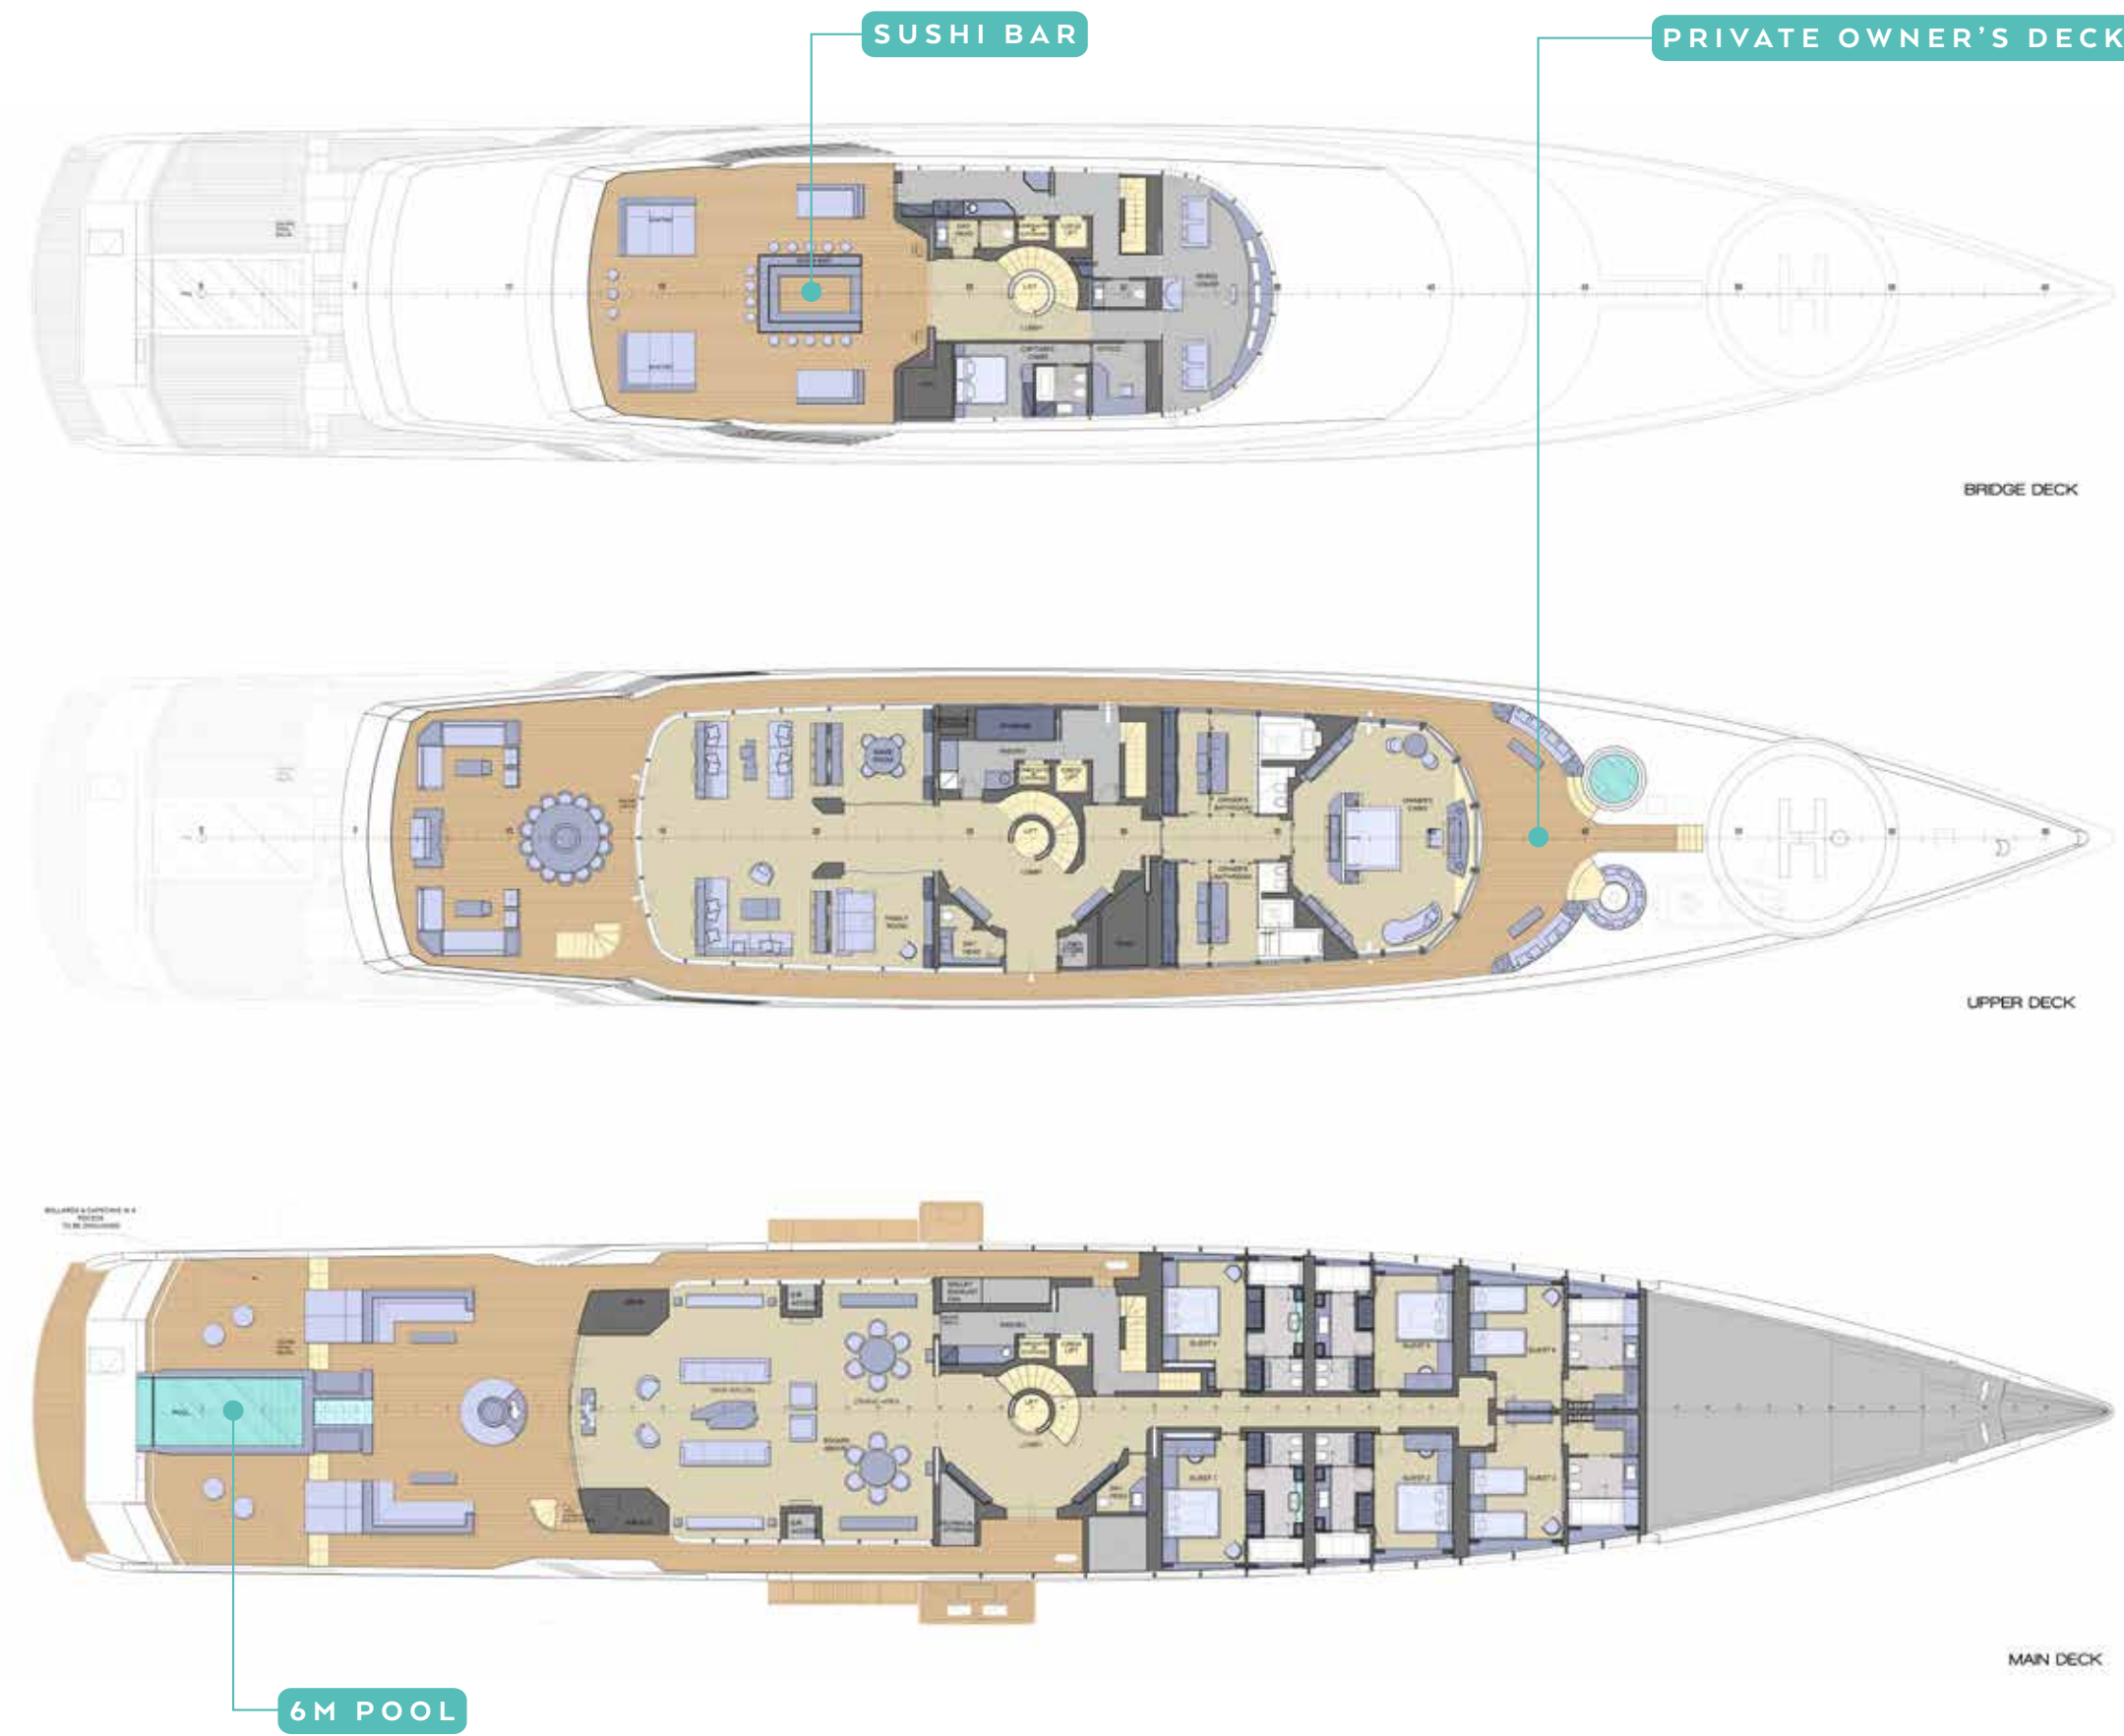

An outstanding SPA area on the lower deck includes a sauna, hamam, hydrotherapy room and massage rooms, while a beautiful beach club is situated aft ready to welcome guests aboard. The aft deck area surrounds the main swimming pool, and the 140m² sun deck provides both shelter and sunbathing areas to suit all needs.

The exterior lines, clean and sharp, are in an harmonic relationship with the Interiors, creating a continuity through the huge windows.

The monochromatic and contemporary Interior, retrace and refuse the idea that it is required to follows trends, and it turns into a different route, creating exclusive environment, where beauty is a consequence of balance.

VITRUVIUS YACHTS MICHELA REVERBERI

Award Winning Naval Architect and Motor Yacht Designer Philippe Briand developed Vitruvius Yachts® LTD

Philippe has more than 12,000 boats built to date, based on his designs.

According to Philippe the primary function of a yacht is to always please the eye and be the pride of her owner. With this vision to design Motor Yachts of perfect proportion Leonardo Da Vinci's Vitruvian Man became a natural symbol to represent the balance Vitruvius Yachts® LTD strives to achieve.

Born in Milan on January 10th 1964, Michela Reverberi established her own company Reverberi Design in 2000.

Headquartered in Rome, Reverberi Design is a high profile architect studio engaged in yachting and residential interior design.

Reverberi Design applies an innovative approach in organising spaces reaching original and unique solutions which satisfies in every detail the most demanding of international customers.

The key trademarks emerging from her works are her deep love for the sea as well as an unbridled approach to space.

Albeit space is shaped to the customer's needs, it never stops being the centre piece of her solutions.

Moving barriers, light and unusual materials are shaped into elegant and original interior solutions presenting a sophisticated balance of shapes and colours. As a result, sea and space are merged into truly unique crafts.

THE WORLD OF TURQUOISE

YOUR YACHT

The reason to undertake the building of a yacht is to get what you want to take you where you want to go in the manner in which you feel at home, at ease, and yes, perhaps a bit spoiled. Yachting is a world of luxury and exclusivity...a world of joy and rich experience. Turquoise is a high - end inventive builder eminently capable of complete customization. Ask... and we will find solutions.

DESIGNED

Turquoise Yachts collaborates with the world-renowned yacht designers such as H2 Yacht Design, Nuvolari Lenard, Philippe Briand/Vitruvius Yachts and Winch Designs - to name a few. Furthermore, Turquoise has a talented in-house naval architecture and design team, offering the development of specifications, layout plans, and detailed 3D modeling right through to the final engineering.

ENGINEERED

Turquoise Yachts' hulls and superstructures are all fully customized. Our high- tech engineers and project managers deliver state-of-the-art engineering solutions and digital design platforms. Each of our superyachts is built with what we call 'the sounds of silence' - multi-layered insulating materials that dramatically reduce the sound levels onboard.

CRAFTED

Turquoise yachts specializes in the highest level of joinery. Alongside our trusted suppliers we have an experienced team of about 150 artisanal craftsmen who work with a variety of materials. All our ultra luxurious interiors are fully customized and reflect the level of detailed precision that has become the signature of Turquoise Yachts.

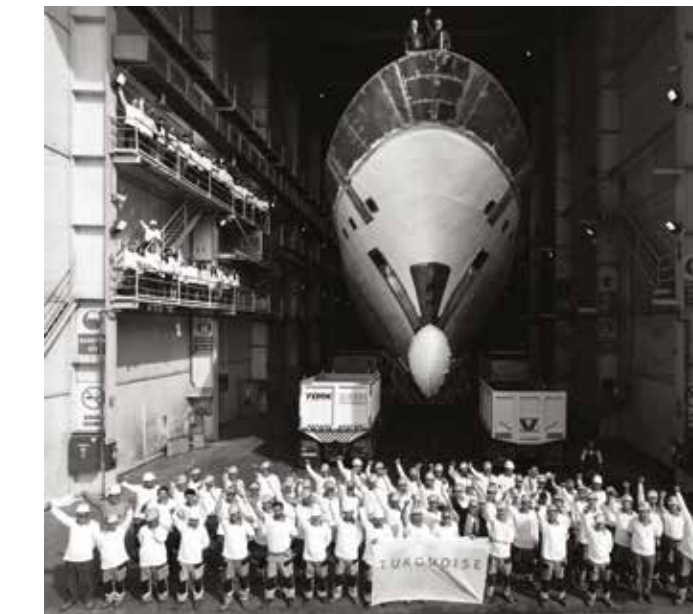

YOUR WORLD

Yachting is all about life style - your lifestyle. Family - friends - watersports - travel - adventure - cuisine - service - entertaining relaxation - the ultimate moveable feast - your personal portal on the world.

Turquoise was established in 1997 by two leaders of the Turkish boat building industry: Proteksan Yachts Inc. and Turquoise Yacht Construction. Launch of the 50m m/y Turquoise in 1994, (now called Double Trouble) was heralded as Turkey's first world class superyacht. Following the success of m/y Turquoise, 20 other megayachts ranging from 40 to 72 meters in length have since been delivered to an international roster of clients from the USA, UK, Europe and Russia. In 2014 MB Holding became the majority shareholder in Turquoise Yachts. Mehmet Karabeyoğlu, one of the founders of the company, remains as the CEO of the renamed shipyard. Today, Turquoise is continually expanding and upgrading its facilities and has several superyachts in build.

Turquoise Yachts is headquartered in Istanbul, the gateway to the eastern Mediterranean and comprises two shipyards on the outskirts of the city-one in Istanbul (Pendik) and the other in Kocaeli. The Istanbul facility is an impressive 25,000 sqm landscaped property capable of accommodating 8 yachts of up to 85m simultaneously. This facility is used primarily for finishing work and interior outfitting. The shipyard is located just a few minutes drive from the international Sabiha Gokcen airport, which connects to a majority of world capitals and also plays host to private aviation. The Kocaeli yard, located just across the bay from Pendik, has a 120m dock and close to 50,000 sqm of space. Here there are three covered sheds, the largest one measuring 160m by 40m, dedicated to steel and aluminium work as well as the installation of heavy machinery and piping.
