

Project Speed – A 93 meter concept yacht designed by Kurt Strand

Norwegian designer and US permanent resident, Kurt Strand is launching his amazing and futuristic looking 93m super yacht concept.

The Speed should top out at 32 knots and reach 3,500 nautical miles at 12 knots on four 2,600-hp MTU 16V2000 M96 diesel engines /Rolls-Royce water jet drives. A pair of Seakeeper M35 stabilizers with active interceptors will ensure a smooth cruising experience.

Her ample 300 square meter aft deck features a huge infinity pool, a retractable LCD tinted glass awning, which covers a section of the aft deck, as well as a double lounge and a bar. Two large garages are designed to house two 10-metre limo tenders, a custom built amphibie car, jet skis and additional water toys and equipment.

A hidden outdoor lounge area with spa, bar is located under the vertical retractable fore deck .This area has also direct access from the inside of the yacht.

The yachts interior layout features 1 master suite and 5 staterooms for a total of 12 guests

She is also capable of carrying up to a 28 crew onboard to ensure a relaxed luxury yacht experience.
